**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

**Full Environmental Assessment Form**  
**Part 3 - Evaluation of the Magnitude and Importance of Project Impacts**  
**and**  
**Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

**Determination of Significance - Type 1 and Unlisted Actions**

SEQR Status:       Type 1                       Unlisted

Identify portions of EAF completed for this Project:     Part 1               Part 2               Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the \_\_\_\_\_ as lead agency that:

- A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.
- B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

- C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

## NOTICE

### Permit Needed for Construction Activities

If your construction operation will disturb or expose one or more acres of soil, the stormwater runoff from your site must be covered by a State Pollutant Discharge Elimination System (SPDES) Permit for Stormwater Discharges from Construction Activity (GP-02-01) issued by the New York State Department of Environmental Conservation (NYSDEC). Under the SPDES permit regulations, soil disturbance includes **clearing vegetation, grubbing, filling, grading, excavation, demolition and any current or proposed construction activity.** You are responsible for obtaining coverage under the SPDES Permit prior to commencing construction activities, and maintaining Erosion and Sediment Control measures until the site has been stabilized.

To obtain coverage under this General Permit, you need to prepare a Stormwater Pollution Prevention Plan (SWPPP) in conformance with NYSDEC technical standards and SPDES Stormwater Permit requirements. After a SWPPP is developed, you must complete a Notice of Intent (NOI), available at <http://www.dec.state.ny.us/website/dow/mainpage.htm>, and mail it to NYSDEC Central Office in Albany. You may also obtain a copy of the NOI at the NYSDEC Regional Offices. If you can certify on the NOI that your stormwater management practices will conform to NYSDEC technical standards, then coverage under the permit may occur in as little as 5 business days. Projects that do not conform to the Department's technical

standards, are located within the Onondaga Lake Watershed, or discharge to designated impaired waterbodies must be submitted to the Department for review and you must wait 60 business days before commencing construction. An instruction manual for preparing the NOI and SWPPP is available on the DEC website.

**Failure to obtain the Permit and implement a SWPPP can result in legal actions, including Stop Work Orders and/or monetary penalties of up to \$37,500 per day.**

If your construction operation is already in progress and it is not covered by an appropriate NYSDEC Permit, contact the NYSDEC Regional Office as soon as possible for assistance. Erosion and Sediment Control measures should be installed without delay and any additional soil disturbance or construction work should cease until you have obtained NYSDEC Permit coverage. After you have completed the SWPPP and can comply with the requirements, then submit your NOI to Albany.

This requirement does not replace any local municipal planning or zoning requirements. Developers and Contractors are encouraged to contact local Code Enforcement Officers as well.

For further information or requests for assistance contact the Region 7 NYSDEC Division of Water at (315) 426-7504.

### Stormwater Pollution Prevention Plan and Permit Coverage Outline

If your project will disturb or expose more than 1 acre of soil, and you are constructing something other than single-family residences such as a town house, apartment, roadway, stockpile or fill area, institutional, commercial, retail or industrial building...

Or, if you are constructing single-family residences and disturbing greater than 5 acres (including home lots):

- 1) Develop a *Full* Stormwater Pollution Prevention Plan (SWPPP) with post-construction stormwater controls (Water Quality and Water Quantity components)

*If the SWPPP conforms with the New York State Stormwater Management Design Manual:*

- 2) Submit a Notice of Intent (NOI) to the DEC in Albany
- 3) Begin construction after a five-business-day authorization period

*If the SWPPP deviates from the Design Manual:*

- 2) Have the SWPPP certified by a licensed professional
- 3) Submit an NOI to the DEC in Albany
- 4) Submit SWPPP to DEC Regional office for review and begin construction after a sixty-business-day DEC review period

If your construction project is single-family residential and will disturb or expose between 1 and 5 acres of soil:

- 1) Develop a *Basic* Stormwater Pollution Prevention Plan (SWPPP) in accordance with the New York Standards and Specifications for Erosion and Sediment Control
- 2) Submit a NOI to the DEC in Albany
- 3) Begin construction after a five-business-day authorization period

**However... if your site is in the Onondaga Lake Watershed, or directly discharging to an impaired 303(d) waterbody\* (even if the soil disturbance is less than 5 acres):**

- 1) Develop a *Full* SWPPP with post-construction stormwater controls
- 2) Have the SWPPP certified by a licensed professional
- 3) Submit an NOI to the DEC in Albany
- 4) Submit SWPPP to DEC Regional office for review and begin construction after a sixty-business-day DEC review period

\* check the NYSDEC website for listings and definitions

**When all construction has been completed and the site has been fully stabilized and vegetated:**

- File a Notice of Termination (NOT) with the NYSDEC
